

Narrow Model SC and SCS Self-Contained Compactor/Containers

Specifications For SC & SCS Narrowed To 6' Wide O/A

All SP Industries Self-Contained Compactor/Containers can be narrowed down to a width of 6' to fit into special applications. However, the unit must be ordered with a rectangular style container to allow a correct fit between the compactor and container.

This modification is ideal for applications requiring separate waste and recycling equipment. Two SC's or SCS's can be placed side-by-side in a limited space and operated off one power unit. The power unit will have all the standard controls except for a larger 40 gallon reservoir, a flow control diverter valve, and two sets of 10' hoses.

A hand lever on the diverter valve allows the operator to control one Self-contained at a time. This special power unit designed to operate two self-contained units and can be ordered for both standard and narrowed models. Operating two units off of power unit entitles the buyer to a substantial savings over the cost of two complete self-contained systems.

SC			
Model	A	B	Capacity
1619	17'4"	22'	13 Cu. Yds.
1822	19'4"	24'	16 Cu. Yds.
2026	21'4"	26'	19 Cu. Yds.
2231	23'4"	28'	22 Cu. Yds.

SCS			
Model	A	B	Capacity
1620	17'4"	22'	17 Cu. Yds.
1824	19'4"	24'	20 Cu. Yds.
2027	21'4"	25'	23 Cu. Yds.
2231	23'4"	28'	26 Cu. Yds.
2435	25'4"	30'	29 Cu. Yds.
